

# Breathe healthy air

## UV-C disinfection upper air CM

As part of the Philips UV-C disinfection upper air device series, Philips UV-C disinfection upper air ceiling mounted is designed to be installed on false ceilings for the disinfection of air in a wide range of applications. Optimised for low ceiling heights, the UV-C rays are distributed at device level and above. The beam of UV-C rays is controlled by specific reflectors and the louvre design. This allows for the disinfection of the air in a space, while ensuring that day-to-day business activities can continue beneath the area where the device is active.

### Benefits

- Allows quiet disinfection of air while business activity continues beneath the level of the device
- UV-C light has been proven to effectively deactivate tested pathogens\*
- Uses Philips UV-C lamps and drivers
- Environmentally friendly – no ozone emissions during or after use

### Features

- Philips PL-S TUV lamp included: 4x9 W
- Shortwave UV radiation peak at 253.7 nm (UV-C)
- The louvres and reflector control the distribution of UV-C at the device level and above, where people are not usually present
- Surface-mounted on false ceilings
- Complies with IEC 62471 standard for photobiological safety

### Application

- Offices
- Retail
- Food outlets
- Hospitality
- Schools
- Banking
- Washrooms

### Warnings and Safety

- DANGER: Risk Group 3 UV product. Like any disinfection system, UV-C lamps and devices must be installed and used in the correct way. Direct exposure to UV-C can be dangerous and result in a sunburn-like reaction to the skin and serious damage to the cornea.
- As UV-C is invisible to the eye, the UV-C upper air device must be installed together with adequate safeguards to ensure that the UV-C upper air device can be operated in a safe way. The UV-C upper air device are only to be used as components in a system that consists of adequate safety safeguards such as, but not limited to, those indicated in the mounting instructions and/or user manuals.
- Direct exposure to UV-C is dangerous. Philips UV-C luminaires systems must only be sold through qualified partners and installed by professionals according to our stringent safety and legal requirements. Our UV-C products are not meant to be used in applications or activities which may cause and/or lead to death, personal injury and/or damage to the environment.
